1954 AMALFI

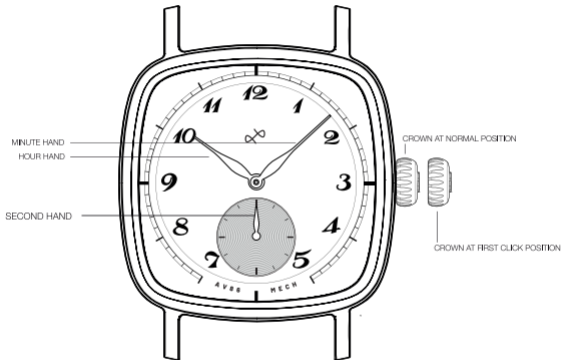

INTRODUCTION

Drawn to the beauty of the Italian Riviera, we found inspiration in its history, its architecture, and its golden light. It was there, at the sun-soaked coastline the 1954 Amalfi Mechanical took form, and a new silhouette emerged, and found its way into the AV86 collection.

A square silhouette, drawn from mid-century geometry. A hand-wound movement, built for presence. The first of its kind in the AV86 collection — designed to be desired.

The 1954 Amalfi Mechanical blends mid-century elegance with a quiet modernity — our first square mechanical watch, hand-wound and thoughtfully refined.

OVERVIEW

SPECIFICATIONS

Caliber:	SeaGull ST17 Handwind
Power reserve:	39 Hours, Fully wound
Glass:	Domed Sapphire Crystal with anti-reflective coating
Water Resistance:	5. ATM - Water tested to 50 Meters

HOW TO SET TIME

1. Pull crown out to first click position.
2. Turn the crown counterclockwise to set hour and minutes hand.
3. Push the crown back into normal position.

HOW TO WIND YOUR WATCH

1. With the crown in normal position turn the crown clockwise.
2. Stop when you feel resistance!

**It is important to stop when feeling resistance when winding.
If the watch is wound too hard it can damage the spring.**
